SUMMARY

Software Developer with a strong foundation in Java, OOP principles, JavaScript, and SQL. Experienced in building responsive web applications using React and Tailwind CSS, with hands-on version control via Git and GitHub. Consistently sharpening problem-solving skills through Data Structures and Algorithms practice on LeetCode and CodeChef.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL, HTML5, CSS3

Soft Skills: Communication, Leadership, Time Management

Frameworks & Libraries: React, Tailwind CSS

Concepts: OOPS, DSA, REST APIs

Database: MySQL, MongoDB

Tools & DevOps: Git, GitHub, VS Code

EXPERIENCE

Technical Internship | VAMP Innovations Ltd — Coimbatore, India

- Studied EV working principles and core subsystems with practical exposure to hardware–software communication for real-time monitoring, control, diagnostics, and system integration.

Technical Internship | ABLE Electronics Services — Coimbatore, India

- Gained hands-on experience in manufacturing, testing, and troubleshooting power conditioning equipment including servo stabilizers, voltage regulators, transformers, and UPS systems.

PROJECTS

Farmer Scheme Eligibility Portal | Major Project

Technologies: React, Tailwind CSS, JavaScript, Java (Spring Boot), MySQL, REST API

- Built a web platform where farmers upload details (Aadhaar, land size, income) and an eligibility engine cross-references government scheme criteria to surface a personalized list of applicable central and state schemes with application links.
- Developed a responsive React + Tailwind CSS front-end with a guided multi-step form and results dashboard, backed by a secure Java Spring Boot REST API with input validation and document upload handling.

Smart Dam Management System using IoT | Mini Project

Technologies: IoT Sensors, Arduino, Embedded C, Cloud Platform (Basics), Machine Learning

- Designed an IoT-based dam monitoring system integrating sensors, automated sluice gate control, predictive flood analysis, and secure data transmission for real-time safety management.

Hydraulic Central Stand For Two-Wheelers

Technologies: Hydraulic Systems, Mechanical Design, Material Selection, Manufacturing & Testing

- Designed and developed a hydraulic center stand for two-wheelers with safety locking mechanisms and structural analysis, enabling safe, stable, and low-effort lifting for improved maintenance accessibility.

CERTIFICATIONS

- Infosys Springboard – Programming in C (May 2024)
- University of California, Davis – Introduction to Web Development (Jan 2025)
- NPTEL Online Course – Design Thinking: A Primer | Score: 79% (Silver Elite)

ACHIEVEMENTS

- Published research paper “Smart Dam Management: Implementing IoT Solutions for Water Level Monitoring and Control” at the 3rd International Conference on Emerging Applications of Material Science and Technology (ICEAMST 2025), RVCE, Bengaluru.
- Secured 3rd Prize in Paper Presentation at the IEEE Women in Engineering (WIE) International Leadership Summit, Anna University, Chennai.

EDUCATION

B.E in Electrical and Electronics | KIT-Kalaignarkaranidhi Institute of Technology, Coimbatore | CGPA: 8.5/10.0

12th (PCMB): 93.5%

10th (State Board, Karnataka): 94.8%
