

AMIRTHA VARSHNI M

📍 Tirupur | ✉ kit27.am006@gmail.com | ☎ 8807980829 | 🌐 [amirtha-1412](#) | [LinkedIn](#)

EDUCATION

KIT-Kalaigarkarananidhi Institute of Technology, Coimbatore - Tamilnadu, India 2023-2027
BE . Computer Science Engineering (AI&ML), Final Year Current **CGPA : 8.07**
Coursework: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Machine Learning, Artificial Intelligence, Computer Networks

EXPERIENCE

Machine Learning Intern — Appin Technology Dec 2024 – Jan 2025

- Built and trained regression models including Linear Regression and Random Forest for taxi fare prediction.
- Evaluated model performance using RMSE and MAE metrics to improve prediction accuracy.
- Deployed a working prototype integrating ML models with a user-friendly frontend interface.

Full Stack Development Intern — Learn Logicfy Technologies LLP Jun 2025

- Developed and deployed four web projects including a personal portfolio, art gallery website, and to-do list application.
- Strengthened skills in responsive web design, DOM manipulation, and UI/UX best practices.
- Gained hands-on experience with frontend development workflows and real-world project deployment.

PROJECTS

AutoDevX - From Jira Ticket to Pull request using AI agents | FastAPI, LangGraph, LLM, ChromaDB, Jira API, GitHub API [Link](#)

- Developed an AI-powered multi-agent SDLC automation platform that autonomously analyzes Jira tickets, generates FastAPI backend code, validates outputs, and creates GitHub Draft Pull Requests.
- Implemented LangGraph-based orchestration workflow connecting Requirement, Developer, QA, and PR agents with shared workflow state and explainable reasoning traces.
- Integrated Jira API for real-time ticket ingestion and GitHub API for automated branch creation, commits, and Draft PR generation.

Customer Relationship Management (CRM) System | Spring Boot, MySQL, Thymeleaf, Spring Security [Link](#)

- Built a full-stack CRM system using Spring Boot and MySQL with role-based authentication.
- Implemented customer, lead, task, and opportunity management with dashboard analytics.
- Added email notifications and Excel export; designed responsive UI using Thymeleaf & Bootstrap

Knowledge Graph Builder with Semantic Validation | FastAPI, Neo4j, SpaCy, React, Docker [Link](#)

- Built an end-to-end system to convert unstructured text and PDFs into structured knowledge graphs using CNN-based
- NLP, relationship inference, and semantic validation.
- Designed a scalable three-layer architecture with Neo4j graph storage and interactive visualization for intuitive exploration of entity relationships.

TECHNICAL SKILLS

Programming Languages: Python, Java, C
Web Development: HTML5, CSS3, JavaScript, React.js
Databases: SQL, MongoDB,
Libraries & Frameworks: Spring Boot, TensorFlow, Scikit-learn, Streamlit
Tools & Platforms: Git, GitHub, Docker, Vercel, Power BI
CS Fundamentals: DSA, OOPS, DBMS

CERTIFICATION & COURSES

IBM - SQL Certification
Coursera – Getting started with Frontend and Web Development
NPTEL – Introduction to Machine Learning
NPTEL - The Joy of Computing Using Python
CISCO – Python Essentials
AWS - AWS Academy Graduate - Cloud Foundations

COMPETITIVE PROGRAMMING

Leetcode : [amirtha2314](#) | Max rating - **1889** | Solved problems: **250+** | Top **6.38%** globally | Badges : **4** | No of Contest : **35+**
Codechef : [kit23bam006](#) | Max rating - **1535** | Position : **2 Star** | Solved Problems : **700+** | No of Contest : **110+**
Codeforces : [Amirtha 1412](#) | Highest Rating : **1134** | Position: **Newbie** | Solved problems: **100+**

ACHIEVEMENTS

- Secured Second Prize in **TNWISE Women Hackathon** for innovative project development.
- AgentHack'26 - Internal Hackathon (Kalaigarkarananidhi Institute of Technology, 2026):** Secured 1st Place by developing "AutoDevX," an AI-driven multi-agent SDLC automation system with Jira integration, automated code generation, QA validation, and GitHub PR workflow automation.
